

**Report of the first quarter (Q1) to Shareholders
for fiscal year 2008**

For the quarter ended June 30, 2007

Message to Shareholders

Dear Shareholders:

DIAGNOS completed the first quarter ended June 30, 2007 reporting revenues of \$214,634. The Corporation focused its time during the quarter on analyzing new data acquired in the Province of Quebec and the Dominican Republic. On May 10, 2007, the Corporation signed a contract with PhinCorp Inc., a financial advisor group for foreign exchange, launching our first Artificial Intelligent application in the financial world. The Corporation intends to deliver additional applications through partnerships during the fiscal year 2008.

With the hiring of a Vice-President for our Natural Resource Division, Ms Jacqueline Monfourny, our short term goals are to expand rapidly on the international scene. Ms Monfourny already has been part of a Canadian group of companies to present our capabilities in Argentina, Chili, Brazil, Colombia and Peru. This trip was funded by the Canadian government.

During the first quarter, the Corporation was able to finalize all the Dominican government requirements for the acquisition of our first property in the Dominican Republic. The Corporation has established a service organization for our mining customers. The result was three (3) service contracts with existing customers and the hiring of new geological human resources. The

Corporation also added four (4) new customers during the first quarter.

We have established a clear strategy for the natural resources market and we expect to have definitive drilling results during the next quarter from our existing clients.

The Corporation is looking at expanding its market penetration in South America through marketing and services agreement partnerships in Chile and Argentina. Our objective is to get CARDS positioned for future exploration work in Latin America.

The Corporation is working with large multi national companies with the objective of getting their validation approval for DIAGNOS technology.

André Larente
President and Chief Executive Officer

August 29, 2007

DIAGNOS inc.

Management Discussion and Analysis

DIAGNOS inc. (TSX Venture Exchange: ADK) is a Canadian software corporation that develops knowledge extraction software and provides data mining services. DIAGNOS is demonstrating a new dimension in analyzing data, text and images simultaneously in a commercial environment.

You will find more information concerning DIAGNOS inc. by consulting SEDAR Web site at www.sedar.com.

Notice to readers

The following discussion, effective as of August 29, 2007, analyses the financial situation of the Corporation as of June 30, 2007 and should be read with the interim consolidated financial statements and accompanying notes, which have been prepared in accordance with Canadian generally accepted accounting principles. The currency used is the Canadian dollar.

The attached unaudited interim consolidated financial statements have been reviewed by the Corporation's external auditors. The accompanying notes are an integral part of the interim consolidated financial statements.

Forward-looking statements

This MD&A contains certain forward-looking statements with respect to the Corporation. These forward-looking statements, by their nature, necessarily involve risks and uncertainties that could cause actual results to differ materially from those contemplated by these forward-looking statements. We consider the assumptions on which these forward-looking statements are based to be reasonable, but caution the reader that these assumptions regarding future events, many of which are beyond our control, may ultimately prove to be incorrect since they are subject to risks and uncertainties that affect us. These risks and uncertainties include risks associated with market acceptance, competitive developments and other factors. Except for ongoing obligations under securities laws to disclose all material information to investors, we disclaim any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

	<i>Fiscal Year 2007</i>	<i>Fiscal Year 2006</i>	<i>Fiscal Year 2005</i>
	\$	\$	\$
Revenue	775,720	709,187	111,746
Other income	133,078	8,373	-
Income taxes	-	-	-
Net loss	(617,133)	(581,864)	(1,746,088)
Loss per share	(0.02)	(0.02)	(0.07)
Total assets	1,601,670	964,273	376,770
Total long-term liabilities	180,061	170,592	215,159

Revenue

During the first quarter of 2008, DIAGNOS registered revenue of \$199,233 and \$15,401 in other income for a total of \$214,634, a decrease of 27% over the first quarter of 2007, where we registered \$96,535 in revenue and \$199,193 in other income for a total of \$295,728. The other income consists of a gain on the sale of options granted on certain mineral exploration claims in the amount of \$10,610 and \$4,791 in interest income.

Expenses

As a result of our efforts to gain market share, our general, sales and administration expenses increased by \$68,508 during the quarter ended June 30, 2007, an increase of 23% over the same quarter of the last fiscal year.

The main contributions to this increase are: consulting services, legal fees and increases in salaries.

Research and development

The Corporation has incurred \$72,632 in research and development costs during the quarter ended June 30, 2007, a decrease of \$11,717 compared to the quarter ended June 30, 2006. This decrease is mainly due to the fact that research projects related to specific solutions were completed and that the Corporation received tax credits from the government of Quebec.

DIAGNOS inc.

Net loss

During the quarter ended June 30, 2007, the Corporation incurred a net loss of \$239,703 (\$0.01 per share) compared to a net loss of \$92,341 (\$0.01 per share) for the period ended June 30, 2006. This increase in net loss compared to the quarter ended June 30, 2006 is due to an increase in general, sales and administrative expenses and a decrease in gains on the sale of options to mineral exploration claims.

Financing activities

During the quarter ended June 30, 2007, no warrants were exercised.

Working capital

As at June 30, 2007, our working capital was \$1,130,690 compared to \$1,326,233 at March 31, 2007. DIAGNOS anticipates financing its activities in the future from revenue, which will cover a portion of the expenses incurred and cash on hand. If for any reason DIAGNOS should require additional cash to pay expenses, the Corporation may have to raise additional cash from private placements.

Share information

As at June 30, 2007, the outstanding shares are common shares and convertible securities:

Common shares	39,928,185
Convertible securities:	
Warrants	2,000,000
Options on shares	4,889,184
Total	<u>46,817,369</u>

Significant accounting policies

Gains on the sale of options to mineral exploration claims are recognized net of the remaining unamortized cost of the related mining asset, included in intangible assets, and net of any unrecoverable costs from the optionee, required to be incurred by the Corporation in order to retain valid title to those mineral exploration claims during the period of the option.

Revenue from data mining services and software is recognized upon delivery in accordance with the contractual conditions in effect with customers.

The Corporation recognizes stock-based compensation and other stock-based payments as compensation expense determined in accordance with the Black & Scholes valuation model, with a corresponding accretion to contributed surplus.

Disclosure controls and procedures

The President and Chief Executive Officer of the Corporation has evaluated the effectiveness of the Corporation's disclosure controls and procedures as of the end of the quarter ended June 30, 2007 and has concluded that such disclosure controls and procedures are adequate and effective. There has been no change in the Corporation's internal control over financial reporting that occurred during the Corporation's most recent interim period that has materially affected, or is reasonably likely to materially affect, the Corporation's internal control over financial reporting.

Outlook

The Corporation's Artificial Intelligence (AI) engine is expected to be the driving force behind building applications for new vertical markets. Our natural resource application CARDS (Computer Aided Resource Detection Software) is continuing to gain market share. The Corporation is focused on delivering solutions for the natural resource market and also on building a royalty based business. This will be accomplished by the acquisition of claims and participating with existing clients in new projects. Secondly, the Corporation acquired data from several sources including the Quebec, Ontario and Dominican Republic governments which it expects to use in the identification of potential claims for purchase.

The Corporation delivered proposals to several large oil & gas exploration companies and is waiting for the results.

Finally, the Corporation is pursuing other markets that require AI technology to resolve complex problems within different industries. DIAGNOS has been approached by other AI companies from Spain and other countries to create partnerships covering North America. The Corporation is working with a group of radiologists based in the Province of Quebec to continue the original work done by DIAGNOS in the medical field. DIAGNOS has also developed a retinopathy screening application. All these new applications will re-enforce DIAGNOS' market penetration and diversify the Corporation's exposure to any one market, should there be economic downturns.

Risk analysis

Several business risks exist such as the market adoption of AI technology, the Corporation's ability to hire and retain top scientific resources and our ability to convince customers in these new vertical markets of the benefit of our technology and its results. The Corporation also relies on its Shareholders to provide funding, in the event it should experience shortfalls, to sustain continued operations.

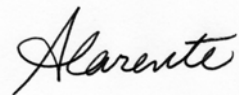

DIAGNOS inc.

Notes to Interim Consolidated Financial Statements

As at June 30, 2007 and March 31, 2007

1. Statutes and nature of activities

The shares of the Corporation are listed on the TSX Venture Exchange. DIAGNOS inc. develops data mining software and provides data mining services. The Corporation designed and developed MCubiX, a data mining software suite capable of extracting knowledge from historical data - in the form of images, text or traditional databases - and making predictions that improve business processes and decision making ability. CARDS (Computer Aided Resource Detection Software), the first vertical application, is dedicated to the natural resources market and can be applied to several areas of prospecting for mineral including diamond, gold, zinc, copper and, oil & gas.

2. Change in accounting policies

On April 1st, 2007, the Corporation has adopted the recommendations of the Canadian Institute of Chartered Accountants Handbook (CICA Handbook) Section 1530, *Comprehensive Income*; Section 3855, *Financial Instruments - Recognition and Measurement*; Section 3861, *Financial Instruments - Disclosure and Presentation*; Section 3865, *Hedges*; and Section 3251, *Equity*. These sections apply to fiscal years beginning on or after October 1, 2006 and provide standards for recognition, measurement, disclosure and presentation of financial assets, financial liabilities and non-financial derivatives, and describe when and how hedge accounting may be applied. Section 1530 provides standards for the reporting and presentation of comprehensive income, which represents the change in equity, from transactions and other events and circumstances from non-owner sources. Other comprehensive income is defined as revenues, expenses, gains and losses that are recognized in comprehensive income, but excluded from net income, in accordance with Canadian generally accepted accounting principles.

Under the new standards, all financial assets, except for those classified as held-to-maturity, loans and receivables, and derivative financial instruments are measured at their fair values. All financial liabilities are measured at their fair values when they are classified as held for trading purposes. Otherwise, they are measured at their carrying value. The adoption of this new section has no impact on these interim consolidated financial statements.

3. Summary of significant accounting policies

a) Use of estimates

The preparation of interim consolidated financial statements in accordance with Canadian generally accepted accounting principles requires management to make estimates that affect the amounts of assets and liabilities reported in the interim consolidated financial statements. Those estimates also affect the disclosure of contingencies at the date of the interim consolidated financial statements and the reported amounts of revenues and expenses during the quarter. Significant estimates include tax credits recoverable, the useful lives of capital assets and intangible assets and certain accrued liabilities. Actual results could differ from those estimates.

b) Consolidation

These interim consolidated financial statements include the accounts of the Corporation and those of its wholly-owned subsidiary, DMS & Technologies Inc.

c) Foreign currency translation

The accounts are translated into the functional currency using the temporal method. Under this method, monetary assets and liabilities are translated at the exchange rates in effect at the balance sheet date. Non-monetary assets and liabilities are translated at historical rates. Revenue and expenses are translated at the average rate for the period. Income and losses resulting from translation are reflected in the statement of income.

d) Government assistance

The Corporation obtained tax credits from the government of Quebec according to the research and development concerning the development of software. The tax credits received are accounted for as a deduction of the related expenses.

e) Revenue recognition

Revenue from data mining services and software is recognized upon delivery in accordance with the contractual conditions in effect with customers.

f) Recognition of gains on the sale of options to mineral exploration claims

Gains on the sale of options to mineral exploration claims are recognized net of the remaining unamortized cost of the related mining asset, included in intangible assets, and net of any unrecoverable costs from the optionee, required to be incurred by the Corporation in order to retain valid title to those mineral exploration claims during the option period.

DIAGNOS inc.

g) Cash and cash equivalents

Cash and cash equivalents consist of cash on hand and balance with banks as well as all highly liquid short-term investments having a term of less than three months from the acquisition date.

h) Investments

Investments are recorded at cost.

i) Capital assets and amortization

Capital assets are recorded at cost less accumulated amortization and related tax credits. Amortization is calculated using the declining balance method at the following annual rates. For the additions since April 1st, 2006, the Corporation is using the straight-line method.

	<u>Annual rates</u>
Office furniture and equipment	- 20%
Computer equipment	- 33 1/3% and 50%

j) Intangible assets and amortization

- a) The mining assets, consisting of mining claims, are amortized using the straight-line method over their useful life, which is two years.
- b) Software is amortized using the declining balance method at the annual rate of 50%.

k) Income taxes

The Corporation provides for income taxes using the liability method of tax allocation. Under this method, future income tax assets and liabilities are determined based on deductible or taxable temporary differences between financial statement values and tax values of assets and liabilities using enacted income tax rates expected to be in effect for the year in which the differences are expected to reverse.

The Corporation establishes a valuation allowance against future income tax assets if, based on available information, it is more likely than not that some or all the future income tax assets will not be realized.

l) Research and development expenses

All expenses related to development activities, which do not meet generally accepted criteria for deferral, and research are expensed as incurred. Development expenses, which meet generally accepted criteria for deferral, are capitalized and amortized against income over the estimated period of benefit.

m) Loss per share

The loss per share is determined using the weighted average number of common shares outstanding during the quarter.

During the quarter, only the warrants and stock options whose exercise price was equal or lower than the average stock market during the exercise were taken into account.

The fully diluted loss per share, which is calculated according to the repurchase of shares method, is equal to the basic loss per share due to the anti-dilution effect of the stock option plan.

n) Share issue expenses

Share issue expenses have been applied against the proceeds from the issuance of share capital.

o) Stock-based compensation plan

The Corporation maintains a stock-based compensation plan, which is described in note 11. Any consideration from plan participants upon the exercise of stock options is credited to share capital.

Stock-based compensation is recorded as a charge to income, using the fair-value obtained by applying the Black & Scholes valuation model, with a corresponding credit to contributed surplus.

4. Temporary investments

	<u>As at June 30, 2007 (Unaudited) \$</u>	<u>As at March 31, 2007 (Audited) \$</u>
Certificate of deposit, interest at 2.85%, maturing November 30, 2007	304,989	302,858
Certificate of deposit, interest at 2.85%, maturing November 30, 2007	304,990	302,858
Certificate of deposit, interest at 4%, maturing April 4, 2007	25,241	12,519
	<u>635,220</u>	<u>618,235</u>

The Corporation has elected to consider these temporary investments as held for trading. Under this classification, any change in value between balance sheet dates is recorded in the consolidated statements of income.

DIAGNOS inc.

Stock option plan

The Corporation has a stock option plan for its directors, senior executives, employees and consultants by virtue of which they can acquire common shares. The conditions of exercise are determined by the Board of Directors following the rules of the TSX Venture Exchange. The options are granted at a price equal to the share price at the closing of market the day preceding the date of grant.

The stock option plan provides that the maximum number of common shares, which may be reserved for issuance to any one optionee pursuant to share options, may not exceed 5% of the common shares outstanding. The maximum number of common shares that may be reserved for issuance to insiders of the Corporation is limited to 20% of the common shares outstanding on the grant date. The maximum number of options, which the Corporation is authorized to issue as at June 30, 2007 is 6,000,000.

The following table presents the changes, which have occurred during the quarter with regard to the stock option plan and summarizes information relating to the stock options outstanding at June 30, 2007.

	Number
Outstanding as at March 31, 2007	4,487,184
Granted	402,000
Exercised	-
Forfeited	-
Outstanding as at June 30, 2007	<u>4,889,184</u>

Under the Corporation's stock option plan, 402,000 options with an exercise price of \$0.26 were granted during the quarter ended June 30, 2007. The compensation cost that has been charged against income is \$39,107 for the quarter ended June 30, 2007, and the counterpart has been credited to contributed surplus in the Shareholders' equity.

The options have a term to maturity during which they can be exercised with dates ranging from March 28, 2008 to June 26, 2012. Grants made prior to June 3, 2004 were subject to exercise periods ranging between one and half years and five years from the date of grant. For options granted subsequent to June 3, 2004, they will vest at 33.33% per year, commencing with the first anniversary of the grant.

Stock warrants

As part of a private placement process, the Corporation issued 2,000,000 warrants entitling the holder to purchase one common share at the price of \$ 0.35 per share. The warrants will expire on October 4, 2007.

DIAGNOS inc.

13. Commitments

- a) Under the terms of operating lease agreements for its operating facilities, the Corporation is committed to make payments of \$154,219, allocated as follows for the three years to come:

2008	\$58,530	2009	\$60,435	2010	\$35,254
------	----------	------	----------	------	----------

- b) Under the terms of operating lease agreements for office equipment, the Corporation is committed to make payments of \$11,396, allocated as follows for the four years to come:

2008	\$3,696	2010	\$3,696
2009	\$3,696	2011	\$ 308

- c) Under the terms of operating lease agreements for computer equipment, the Corporation is committed to make payments of \$6,587 during fiscal year 2008.

14. Financial instruments

a) Fair value

Cash and cash equivalents, temporary investments, amounts receivable, accounts payable and accrued liabilities are financial instruments whose fair value approximates their carrying value due to their short-term maturity.

b) Credit risk

Financial instruments, which potentially subject the Corporation to concentrations of credit risk, consist primarily of cash and cash equivalents. These financial instruments are held with high-credit quality financial institutions. Consequently, management considers the concentration of risk related to cash and cash equivalents to be minimal.

c) Interest rate risk

As at June 30, 2007, the Corporation's exposure to interest rate risk is summarized as follows:

Cash and cash equivalents	- Fixed and variable interest rate
Amounts receivable	- Non-interest bearing
Accounts payable and accrued liabilities	- Non-interest
