VENTURE TSX TICKER: ADK

Colt Capital Corp. acquires two uranium properties from DIAGNOS

Brossard, Quebec, Canada –May 16, 2007 - DIAGNOS inc. ("DIAGNOS" or the "Corporation") (VENTURE TSX: ADK), a leader in the use of artificial intelligence ("AI") and advanced knowledge extraction techniques, announced today that its Natural Resource Division has signed a letter of agreement with Colt Capital Corp., a Canadian mineral exploration company based in Vancouver, B.C., granting an exclusive option to earn 100% interest in its Urasand and Lac Barrin North prospective uranium properties in the NS 12L16 and 12M08. The two projects consist of respectively 64 and 24 claims. They cover approximately 5,000 hectares of terrain.

Colt Capital will pay DIAGNOS a cash sum for the two properties of \$90,000 CDN. Furthermore, on the property (or properties) upon which an economic discovery is made, a bonus of \$70,000 CDN in Colt's shares and 2% NSR (Net Smelter Return) will be granted to DIAGNOS. Colt Capital Corp. will have the option to acquire 1% of this NSR for \$1,000,000 CDN any time within five years of the economic discovery.

Ms Jacqueline Monfourny, Vice-President of the Natural Resources Division, is happy to announce this first agreement in uranium and declared: "We are glad to work with Colt Capital Corp, a very professional exploration company and we are looking for a long partnership."

DIAGNOS has other good properties showing a potential in uranium and other minerals and is currently in partnership's negotiations with several exploration companies on its properties.

About DIAGNOS

DIAGNOS inc. has developed data mining software and provides data mining services. The Corporation designed and developed MCubiX, a data mining software suite capable of extracting knowledge from historical data - in the form of images, text or traditional databases - and making predictions that improve business processes and decision making ability. CARDS (Computer Aided Resource Detection System) can be applied to several sectors of prospecting, such as diamond, gold, zinc, copper and the oil and gas, and each one of these resources require a distinct methodology endorsed by the application. For further information, please visit our Website at www.diagnos.ca.

The Corporation's objective is to develop a royalty stream by significantly enhancing and participating in the exploration success rate of mining and oil and gas companies.
