SOURCE: DIAGNOS inc.

VENTURE TSX TICKER: ADK

DIAGNOS will generate a local signature on the Guillet Project for Vantex Resources

Brossard, Quebec, Canada – February 8, 2007 - DIAGNOS inc. ("DIAGNOS" or the "Corporation") (VENTURE TSX: ADK), a leader in the use of artificial intelligence ("AI") and advanced knowledge extraction techniques, announced today the signature of an agreement for the use of the system CARDS (Computer Aided Resource Detection Software) to generate potential exploration targets on the Guillet property of Vantex Resources Ltd (VENTURE TSX: VTX).

"We believe that the system CARDS, coupled to our own geological and geophysics data, will be able to help us to discover other gold bearing targets on the Guillet property." declared Mr Guy Morissette, President of Vantex Resources. "For 14 months, we have built regional signatures of precious and base metal with the assistance of the data of SIGEOM of the Chibougamau, Rouyn-Noranda, Matagami and Belleterre region. The first step will be to apply all these regional signatures to their Guillet project, located in the Belleterre region. The second step will consist in building a local gold signature by using all their data (geophysics, geological, geochemical, etc.). The goal of this work is to identify new zones having the same characteristics as those found in the Belleterre region and outlined by our CARDS application." declared Mr Michel Fontaine, Vice-President – Business Development of DIAGNOS.

About DIAGNOS

DIAGNOS inc. develops and markets data mining software. The Corporation designed and developed MCubiX, a data mining software suite capable of extracting knowledge from historical data - in the form of images, text or traditional databases - and making predictions that improve business processes and decision making ability. CARDS (Computer Aided Resource Detection Software) can be applied to several sectors of prospecting, such as diamond, gold, zinc, copper and the oil and gas, and each one of these resources require a distinct methodology endorsed by the application. For further information, please visit our Website at www.diagnos.ca.

The Corporation's objective is to develop a royalty stream by significantly enhancing and participating in the exploration success rate of mining and oil and gas companies.
