VENTURE TSX TICKER: ADK

DIAGNOS continues its round of acquisition of mining properties in the 32D region

Brossard, Quebec, Canada – March 29, 2006 - DIAGNOS inc. ("DIAGNOS" or the "Company") (VENTURE TSX: ADK), a leader in knowledge extraction and artificial intelligence, announced today that it has acquired nine (9) new properties based on the interpretation of a database acquired from the Quebec government in the Rouyn-Noranda region.

These batches of acquired mining titles are located in the Rouyn-Noranda, Malartic, Aiguebelle area (in 32D NTS sheet), a zone with high production of ore. This area contains several active mines, such as the Bouchard-Hébert (Mobrun) mine (2,775,600 t at 0.56% Cu, 5.51% Zn, 1.05 g/t AU and 39.46 g/t Ag), the Doyon mine (3,730,000 t at 4.8 g/t Au), the Mouska mine (144,000 t at 18.22 g/t Au), the Bourquet No 2 mine (561,700 t at 6.2 g/t Au, 4.1 g/t Ag and 0.17% Cu) and the Donald J. Laronde (Dumagami) mine (4,534,427 t at 1.86 g/t Au, 86.75 g/t Ag, 0.16% Cu, 5.24% Zn and 0.69% Pb). These acquired properties were selected based on DIAGNOS' CARDS (Computer Aided Resource Detection Software) application, which highlights area with high mineral potential and having the same signature as the past and currently producing base and precious metal mines in the region.

Moreover, DIAGNOS is currently in negotiation with several mining companies of mining exploration for partnerships on these properties.

About DIAGNOS

DIAGNOS inc. develops and markets data mining software. The Company designed and developed MCubiX, a data mining software suite capable of extracting knowledge from historical data - in the form of images, text or traditional databases - and making predictions that improve business processes and decision making ability. CARDS (*Computer Aided Resource Detection Software*) can be applied to several sectors of prospecting, such as diamond, gold, zinc, copper and the oil and gas, and each one of these resources require a distinct methodology endorsed by the application. For further information, please visit our Website at www.diagnos.ca.

The Company's objective is to develop a royalty stream by significantly enhancing and participating in the exploration success rate of mining and oil and gas companies.

The TSX Venture Exchange has not reviewed and does not accept responsibility for the adequacy or accuracy of this release.
