DIAGNOS – 2009 Second quarter financial results

Brossard, Quebec, Canada – November 11, 2008 - DIAGNOS inc. (“DIAGNOS” or “the Corporation”) (TSX Venture: ADK), a leader in the use of artificial intelligence and advanced knowledge extraction techniques, announced today that it has published its 2009 second quarterly report for the three-month period ended September 30, 2008.

DIAGNOS ended the second quarter of fiscal year 2009 with a net income of C\$8,888 compared to a net income of C\$36,744 for the second quarter of fiscal year 2008 ended September 30, 2007.

Revenue amounted to a quarterly level record of C\$1,021,865, an increase of C\$642,144 over the revenue amount of C\$379,721 for the quarter ended September 30, 2007. This increase of C\$642,144 is mainly due to revenue derived from project management services in the amount of C\$450,169 and an increase of C\$158,639 in revenue derived from data mining services.

As at September 30, 2008, the Corporation has close to C\$2,756,000 in cash and short term investments and does not anticipate a liquidity shortfall in the near term.

The Corporation’s objective is to develop a royalty stream by significantly enhancing and participating in the success rate of natural resources companies. As at September 30, 2008, DIAGNOS has a portfolio of 22 economic discovery royalty agreements.

DIAGNOS can count on a multidisciplinary team that includes professionals in geophysics, geology, artificial intelligence, mathematics, information technology, as well as remote sensing and image interpretation.
