VENTURE TSX TICKER: ADK

DIAGNOS and its partner Cairnalys deliver advanced emailing analytics to eBay

Brossard, Quebec, Canada – December 7, 2006 - DIAGNOS inc. ("DIAGNOS" or the "Corporation") (VENTURE TSX: ADK), a leader in the use of artificial intelligence ("AI") and advanced knowledge extraction techniques, announced today it has signed, with its partner Cairnalys in France, an agreement for the use of DIAGNOS' technology to deliver advanced email marketing analytics to eBay.

"We are pleased to announce that we have been selected to provide our technology as part of a prototype that Cairnalys has developed for eBay. DIAGNOS and Cairnalys are delivering advanced emailing analytics to eBay using an integrated version of DIAGNOS' AI engine and scoring technology," noted Mr André Larente, President of DIAGNOS.

Cairnalys is a software and service company specializing in customer loyalty and customer knowledge development through email marketing analytics.

Mr Dominique Lahaix, Founder of Cairnalys said: "We have been impressed by DIAGNOS' technical capabilities and their investment in the product line. By integrating DIAGNOS' data mining tools with the competencies of Cairnalys' 25 years of experience in data processing, we believe we can optimize emailing solutions with advanced personalization along with customer's center of interest.

About DIAGNOS

DIAGNOS inc. develops and markets data mining software. The Corporation designed and developed MCubiX, a data mining software suite capable of extracting knowledge from historical data - in the form of images, text or traditional databases - and making predictions that improve business processes and decision making ability. CARDS (*Computer Aided Resource Detection Software*) can be applied to several sectors of prospecting, such as diamond, gold, zinc, copper and the oil and gas, and each one of these resources require a distinct methodology endorsed by the application. For further information, please visit our Website at www.diagnos.ca.

The Corporation's objective is to develop a royalty stream by significantly enhancing and participating in the exploration success rate of mining and oil and gas companies.

The TSX Venture Exchange has not reviewed and does not accept responsibility for the adequacy or accuracy of this release.
