Impressive results of gold in a new undiscovered zone at Bachelor/Hewfran

Brossard, Quebec, Canada – November 2nd, 2010 – DIAGNOS inc. (“DIAGNOS” or “the Corporation”) (TSX Venture: ADK), a leader in the use of artificial intelligence and advanced knowledge extraction techniques, announced today, as mentioned in a press release from Metanor Resources (“METANOR”) dated today November 2, 2010, impressive results on the CARDS gold targets on a potential gold zone (Zone 3) commencing at surface situated 2.0 km from the Bachelor Lake Mill and the grab samples greater than 10 g/t were found only 2 to 10m from the road leading to the mill.

This new mineralized zone is composed of quartz veins in an East-West orientated shear zone. The best results obtained were as follows:

- Sample # 867355: 11.05 g/t Au;
- Sample # 867356: 11.03 g/t Au;
- Sample # 867359: 14.80 g/t Au.

This discovery was made using CARDS technology. DIAGNOS was mandated to conduct exploration on the identified targets using our proprietary CARDS system. Further exploration work is expected to follow the extension of this structure.

Analyses were performed by fire assay at the Bachelor Mine laboratory with eventual verification of some samples at the ALS Assay Laboratory in Val-d'Or, Quebec.

Mr. André Tremblay, P Eng. of Metanor Resources Inc., is the qualified person pursuant to National Instrument 43-101 and supervised the technical information presented in the news release.

About DIAGNOS

Founded in 1998, DIAGNOS is a publicly traded Canadian corporation with a mission to commercialize technologies combining contextual imaging and traditional data mining thereby improving decision making processes. DIAGNOS offers products, services, and solutions to clients in a variety of fields including natural resources, healthcare, and entertainment.

The TSX Venture Exchange has not reviewed and does not accept responsibility for the adequacy or accuracy of this press release.
