CODELCO, the main copper producer in the world, has signed a service agreement for the use of CARDS in Chile

Brossard, Quebec, Canada – January 21st, 2010 - DIAGNOS inc. (“DIAGNOS” or “the Corporation”) (TSX Venture: ADK), a leader in the use of artificial intelligence and advanced knowledge-extraction techniques, announced today the signature of an agreement for the use of its CARDS (Computer Aided Resource Detection System) technology, to generate potential exploration targets on Codelco’s (Corporacion Nacional del Cobre de Chile) exploration programs in Chile.

DIAGNOS will assist Codelco in identifying targets by using its CARDS technology, which makes possible the identification of sites having the same signature as known mineralized occurrences. DIAGNOS uses its proprietary technology to analyze geological, geophysical and geochemical to enable the identification of patterns hidden in the large amount of data each customer owns.

DIAGNOS, a multidisciplinary Corporation, can count on a team of 18-people among which are professionals in geology, artificial intelligence, mathematics and imagery.

About Codelco

Codelco is the main copper producer in the world. The corporation also controls around 20% of the world reserves of this metal. Codelco produced 1.78 million metric tons of refined copper (including its interest in El Abra mine). This figure is equivalent to 11% of the world copper production. Its corporate strategy is coordinated from its Head Office in Santiago, Chile.

About DIAGNOS

Founded in 1998, DIAGNOS is a publicly traded Canadian corporation with a mission to commercialize technologies combining contextual imaging and traditional data mining thereby improving decision making processes. DIAGNOS offers products, services, and solutions to clients in a variety of fields including natural resources, healthcare, and entertainment.
