VENTURE TSX TICKER: ADK

Partnership agreement between DIAGNOS and RSW inc.

Brossard, Quebec, Canada – March 6, 2006 - DIAGNOS inc. ("DIAGNOS" or the "Company") (VENTURE TSX: ADK), a leader in knowledge extraction and artificial intelligence, announced today the signature of a partnership agreement with RSW inc., a firm of consulting engineers joining experience and knowledge in the mining engineering field for more than 35 years.

The role of DIAGNOS will be to identify exploration targets using its CARDS (Computer Aided Resource Detection Software) technology from scientific data (geophysical, geological, geochemical, drill holes data, structures, etc.) in a predetermined region. As for RSW, it will evaluate the anomalies identified by DIAGNOS using the following work: geological mapping, soil and rock geochemistry, geophysical land survey, supervision of drilling, Ni 44-101 qualification report. In the case of a finding, RSW will conduct a feasibility study and any other services linked to the setting of a mine or to the operation of an ore processing facility.

Mr Pierre Trudel, Project Manager for RSW inc. has declared: "We believe that the CARDS technology developed by DIAGNOS will become a useful prospecting tool for all mining exploration companies. We are pleased to establish a partnership with DIAGNOS that will allow all of our present and potential clients to benefit from this tool using artificial intelligence. So, this new methodology will permit to extract all the knowledge from scientific data in order to find an economic deposit."

About DIAGNOS

DIAGNOS inc. develops and markets data mining software. The Company designed, developed and markets MCubiX, a data mining software suite capable of extracting knowledge from historical data - in the form of images, text or traditional databases - and making predictions that improve business processes and decision making ability. CARDS (*Computer Aided Resource Detection Software*) can be applied to several sectors of prospecting, such as diamond, gold, zinc, copper and the oil and gas, and each one of these resources require a distinct methodology endorsed by the application. For further information, please visit our Website at www.diagnos.ca.

The Company's objective is to develop a royalty stream by significantly increasing the exploration success rate of mining and oil and gas companies around the world.
