DIAGNOS acquires 1,193 new additional claims with its Ontario partner for the Plan Nord in the province of Quebec

Brossard, Quebec, Canada – January 10, 2013 - DIAGNOS inc. (“DIAGNOS” or “the Corporation”) (TSX Venture: ADK), a leader in the use of artificial intelligence and advanced knowledge-extraction techniques, is pleased to announce the acquisition of 1,193 additional claims in the Plan Nord in the province of Quebec. Based on the press release dated August, 22, 2012 announcing the acquisition of 2,969 claims, to date DIAGNOS has acquired with its Ontario partner 4,162 claims in a project covering more than 304,000 square kilometers.

DIAGNOS has used its proprietary Computer Aided Resource Detection System (CARDS) to target the mineral potential of the remote, sparsely staked northern portion of the province of Quebec. The work consisted of compiling, processing, and merging available geological, geochemical, geophysical, and topographical data as well as satellite imagery of the area.

“We are presently working with our partner to plan the fieldwork for summer 2013, directly on the targeted zones by CARDS. We anticipate 60 days of work with specialized teams of geologists in this territory.” noted Michel Fontaine, VP Natural Resources of DIAGNOS.

About DIAGNOS

Founded in 1998, DIAGNOS is a publicly traded Canadian corporation (TSX: ADK), with a mission to commercialize technologies combining contextual imaging and traditional data mining thereby improving decision making processes. DIAGNOS offers products, services, and solutions to clients in a variety of fields including healthcare, natural resources, and entertainment.
