DIAGNOS Announces An Additional Expansion of Successful Program in the UAE

Brossard, Quebec, Canada – March 11th, 2014 - Diagnos Inc. (“DIAGNOS” or “the Corporation”) (TSX Venture: ADK), a leader in healthcare technical services including, screening, software and algorithm development, data analysis, and image processing, announced today a further expansion of the agreement announced on November 26th 2013 to further increase screening capacity in the country.

“Having announced a 100% expansion of our screening program in the UAE in November 2013, we are very pleased to have this further 50% expansion only 4 months later. Our client has seen a material impact on their business in the UAE and asked us for this increase to capture emerging market demand for their products and consequently for our services which are helping drive that demand. As a result of this expansion the client will now have a total of 12 screening units operating across the UAE and will be able to pursue further opportunities with key health care providers in the country. We are very happy that our service is appreciated by the client and it is demonstrating a very positive impact on their bottom line, as evidenced by subsequent expansions of the program. Due to our favourable program performance and strong client relationship, we are now pursuing materially important leads generated by our client’s complimentary referrals to key country-level decision-makers worldwide within the organization.” said Peter Nowacki, Diagnos’ Vice-President.
