DIAGNOS Announces First Screening Unit In Argentina

Brossard, Quebec, Canada – August 21, 2014 - Diagnos Inc. (“DIAGNOS” or “the Corporation”) (TSX Venture: ADK), a leader in healthcare technical services including screening, software and algorithm development, data analysis, and image processing, announced today the signing of a contract with a large global pharmaceutical company for a screening project in Argentina.

“We are pleased to have received so much support from the global headquarters of our client in the UAE and India; they have watched our successful programs grow and are asking us to expand into other countries. The purpose of this project is to prove that our screening program works in an Argentinean environment. From our experience, once a project has proven itself with one or two screening units in a region, the number of screening units tends to increase exponentially. For example, we started with a similar pilot project of one screening unit in the UAE in 2011, and we now have 14 screening units there,” said André Larente, Diagnos’ President.
