DIAGNOS Welcomes Mr. Francis Bellido to its Board of Directors

Brossard, Quebec, Canada – November 28, 2019 - Diagnos Inc. (“DIAGNOS” or “the Corporation”) (TSX Venture: ADK) (OTCQB: DGNOF), a leader in early detection of critical health issues through the use of its FLAIRE platform based on Artificial Intelligence (AI), is pleased to announce the appointment, effective November 27, 2019, of Mr. Francis Bellido to the Corporation’s board of directors (the “Board”).

Mr. Bellido has spent his career overseeing and leading the development of several organizations in the healthcare industry. He brings sound financial management expertise, deep operating and leadership experience, and a global business perspective that he acquired over 30 years of international experience in the Biosciences, Healthcare and Financial industries. Notably, Mr. Bellido managed a CA\$300M life science investment Fund (SGF-Santé) that produced several key players in the Medical Device industry.

“We are pleased that Francis has accepted to join the Board. His great knowledge of the healthcare industry and his business relationships will directly contribute to the growth of our business,” said Mr. François Côté, Chairman of the Board.

The Corporation also announces that it has received acceptance from the TSX Venture for the issuance of 3,076,922 non-transferable share purchase warrants as part of a short term financing of CA\$400,000 detailed in the November 26, 2019 press release on the same subject.

About DIAGNOS

DIAGNOS is a publicly-traded Canadian corporation with a mission of early detection of critical health issues through the use of its Artificial Intelligence (“AI”) tool CARA (Computer Assisted Retina Analysis). CARA is a tele-ophthalmology platform that integrates with existing equipment (hardware and software) and processes at the point of care. CARA’s Artificial Intelligence image enhancement algorithms make standard retinal images sharper, clearer and easier to read. CARA is accessible securely over the internet, and is compatible with all recognized image formats and brands of fundus cameras, and is EMR compatible. CARA is a cost-effective tool for screening large numbers of patients in real-time. CARA complies with local regulations, is FDA cleared for commercialization in the United States of America, is Health Canada licensed for commercialization in Canada and is CE marking compliant in Europe.
